

SPICE winter school

Modern Simulation Methods in Materials Science

November 17th-20th 2014, Schloss Waldthausen, Mainz

Scientific Organizers

Thomas Speck
Marialore Sulpizi
Peter Virnau

Keynote Speakers

Kurt Kremer
Jairo Sinova

Lecturers

Benjamin Krüger
Yi Liu
Burkhard Dünweg
Friederike Schmid
Georg Schwiete
Giovanni Settanni
Thomas Speck
Marialore Sulpizi
Roland Winkler
Zhe Yuan

Introductory lectures on simulation methods for selected topics in soft and hard condensed matter: liquids, polymers, spintronic, and magnetic materials.

The Spin Phenomena Interdisciplinary Center aims to bring together scientists from diverse disciplines and of varying seniority in the broad area of spin related research. Its goal is to break down scientific barriers and foster emergent areas of research that combine the strengths of different fields.
