Ordered phases: spontaneously break symmetry of Hamiltonian

Normal non-magnetic phase

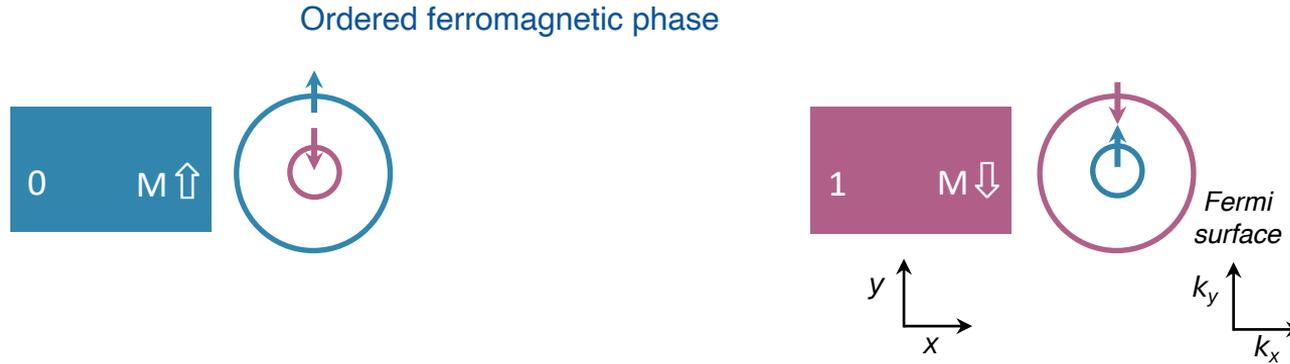

spin-space rotation symmetry

$$\frac{1}{2} \sum_{i \neq j} \frac{1}{4\pi\epsilon} \frac{e^2}{|\mathbf{r}_i - \mathbf{r}_j|}$$

spin independent

Ordered phases: spontaneously break symmetry of Hamiltonian

Spontaneously broken spin-space rotation symmetry

$$\frac{1}{2} \sum_{i \neq j} \frac{1}{4\pi\epsilon} \frac{e^2}{|\mathbf{r}_i - \mathbf{r}_j|}$$

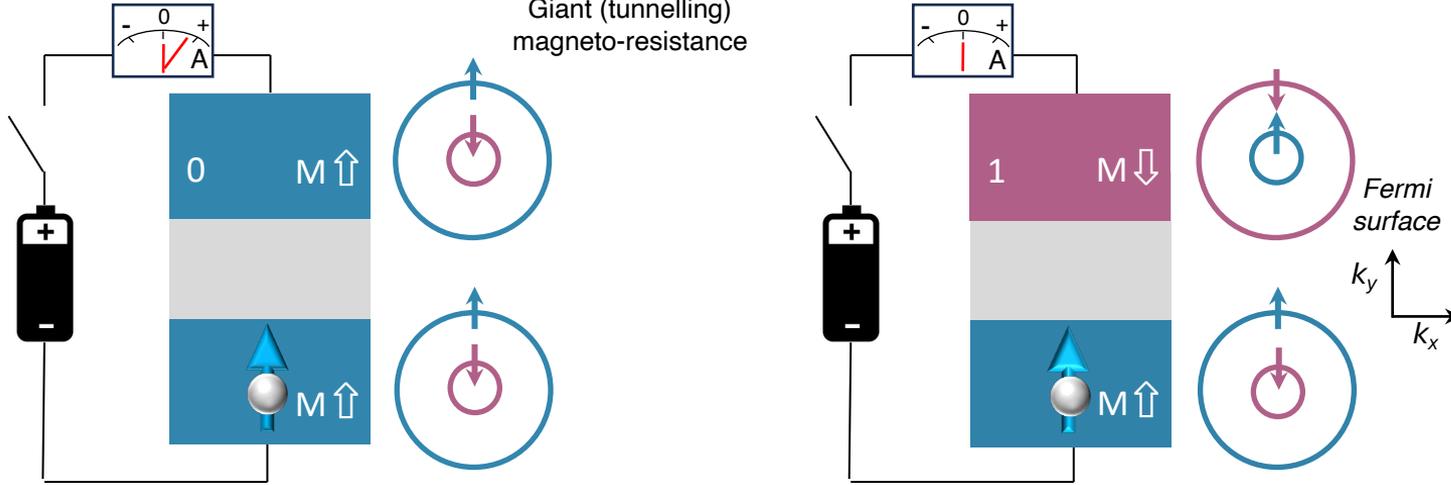

spin independent

Ordered phases: spontaneously break symmetry of Hamiltonian

Ferromagnetic spintronics

Fert, Grunberg *Nobel Prize (2007)* Parkin *Millenium Technology Prize (2014)*

Giant (tunnelling) magneto-resistance

Spontaneously broken spin-space rotation symmetry

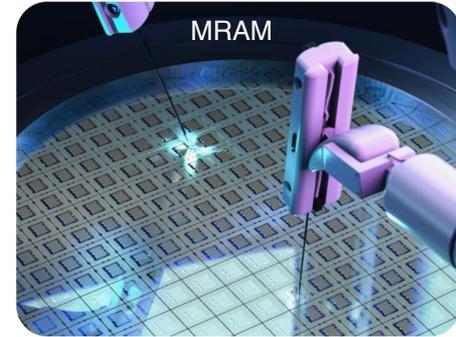

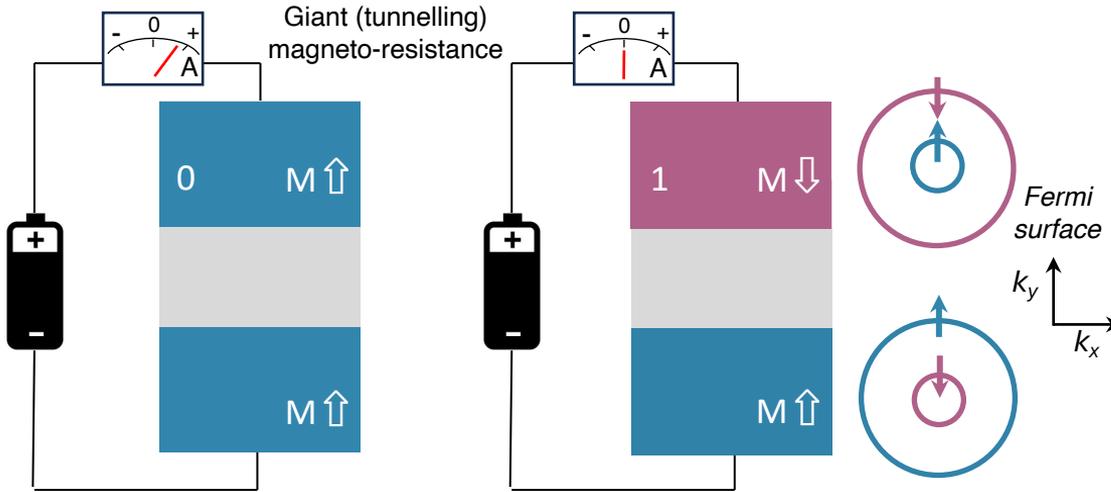

$$\frac{1}{2} \sum_{i \neq j} \frac{1}{4\pi\epsilon} \frac{e^2}{|\mathbf{r}_i - \mathbf{r}_j|}$$

spin independent

Ordered phases: spontaneously break symmetry of Hamiltonian

Ferromagnetic spintronics

Fert, Grunberg *Nobel Prize (2007)* Parkin *Millenium Technology Prize (2014)*

IBM, TSMC, Samsung, Global Foundries, ...
Int. Roadmap for Devices and Systems (2023)

- X M → stray field
- X M → GHz speed limit

Spontaneously broken spin-space rotation symmetry

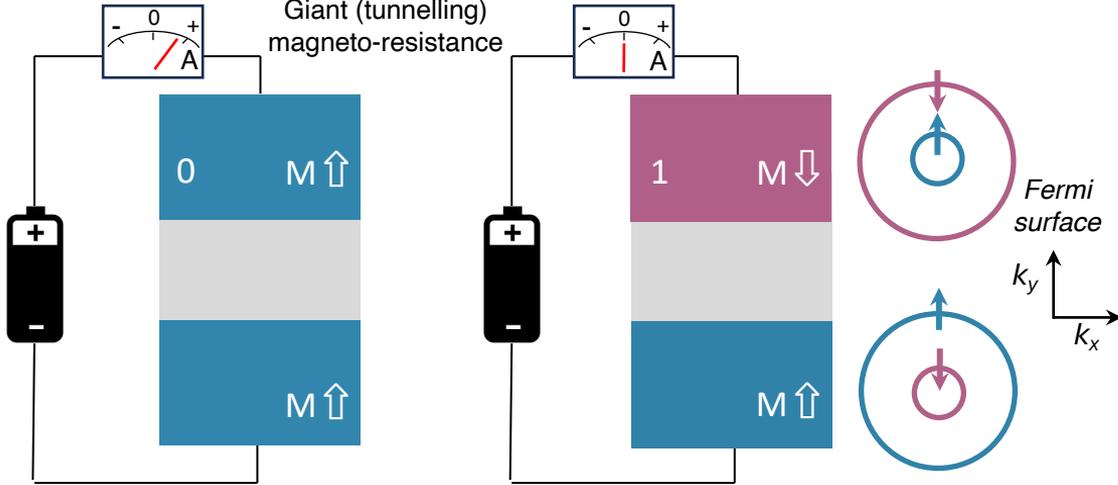

$$\frac{1}{2} \sum_{i \neq j} \frac{1}{4\pi\epsilon |\mathbf{r}_i - \mathbf{r}_j|} \frac{e^2}{\text{spin independent}}$$

Ordered phases: spontaneously break symmetry of Hamiltonian

Ferromagnetic spintronics

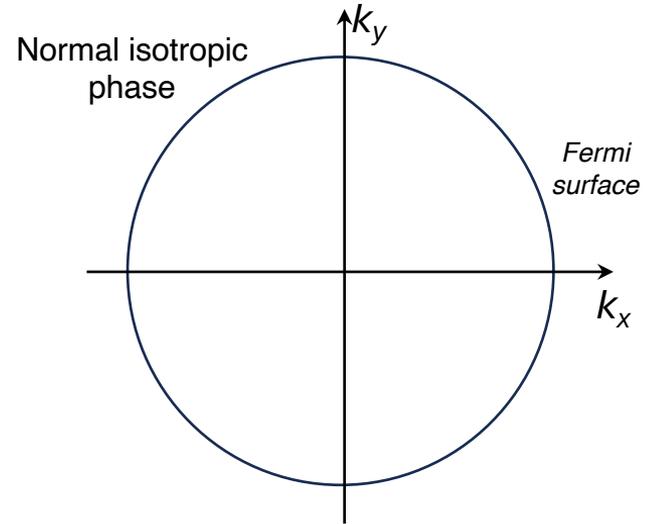

Fert, Grunberg *Nobel Prize (2007)* Parkin *Millenium Technology Prize (2014)*

Giant (tunnelling) magneto-resistance

Electronic nematics

Perspective:
Fradkin, Kivelson, Oganesyan, *Science* **315**, 196 (2007)

Spontaneously broken spin-space rotation symmetry

$$\frac{1}{2} \sum_{i \neq j} \frac{1}{4\pi\epsilon} \frac{e^2}{|\mathbf{r}_i - \mathbf{r}_j|}$$

spin independent & isotropic

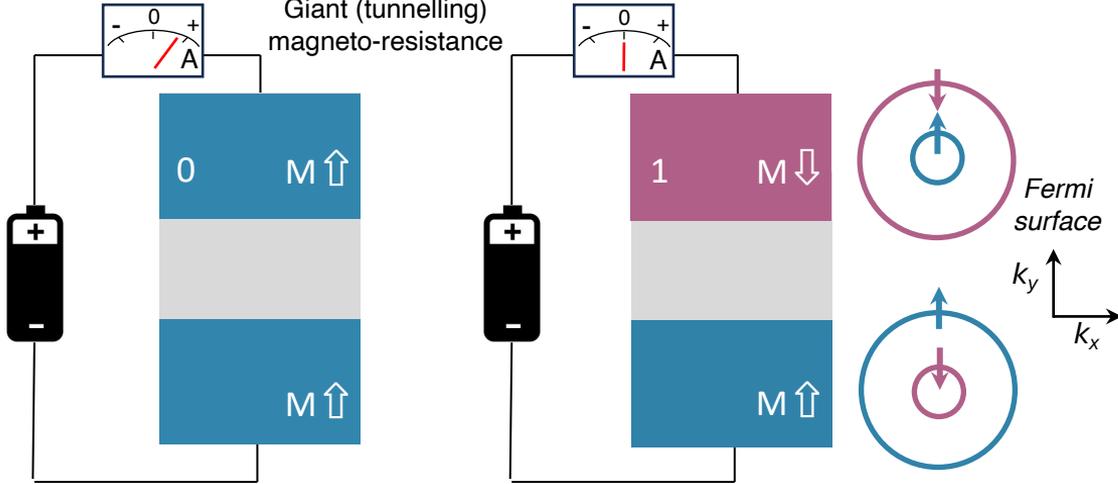

real-space rotation symmetry

Ordered phases: spontaneously break symmetry of Hamiltonian

Ferromagnetic spintronics

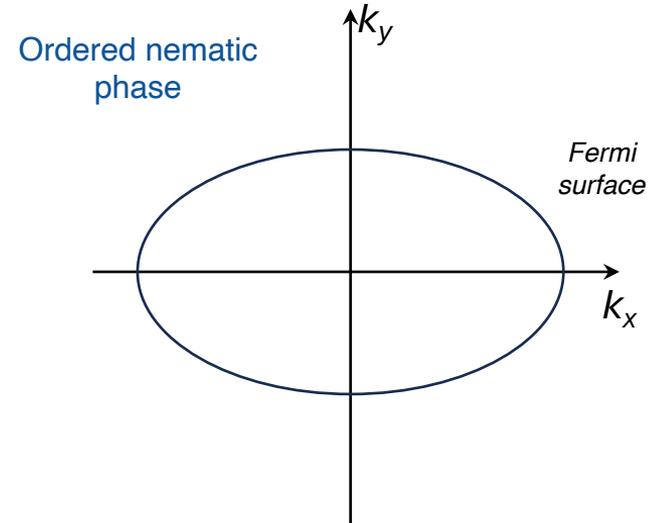

Fert, Grunberg *Nobel Prize (2007)* Parkin *Millenium Technology Prize (2014)*

Giant (tunnelling) magneto-resistance

Electronic nematics

Perspective:
Fradkin, Kivelson, Oganesyan, *Science* **315**, 196 (2007)

Spontaneously broken spin-space rotation symmetry

$$\frac{1}{2} \sum_{i \neq j} \frac{1}{4\pi\epsilon} \frac{e^2}{|\mathbf{r}_i - \mathbf{r}_j|}$$

spin independent & isotropic

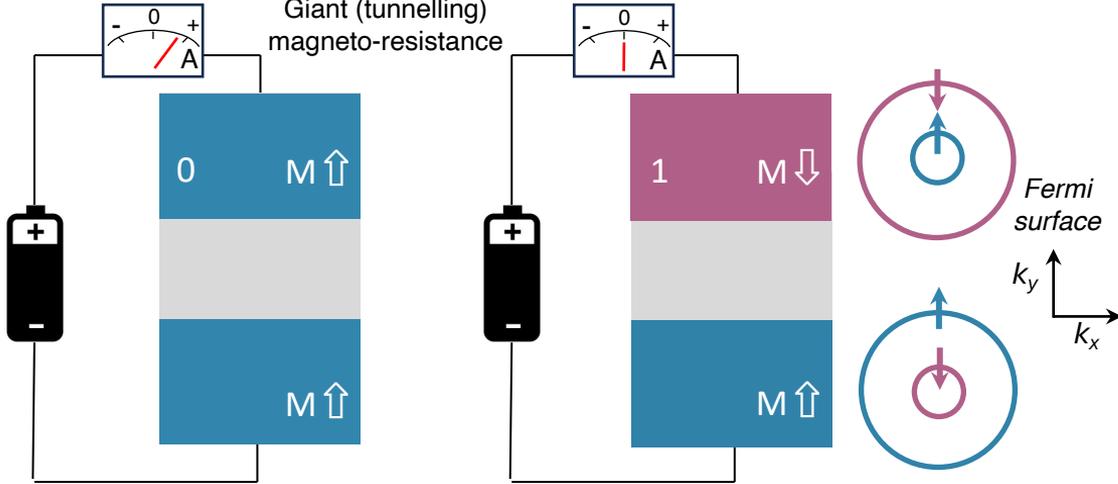

Spontaneously broken real-space rotation symmetry

Ordered phases: spontaneously break symmetry of Hamiltonian
